

Assignment –1

Name- Yashraj Ranjeet Shitole

Roll no. - 86633

Introducing Relational Databases.

- 1) Which field of the Customers table is the primary key?
- Cnum is Primary key of Customer table.
- 2) What is the 4th column of the Customers table?
- Rating is 4th column of Customer table.
- 3) What is another word for row? For column?
- Row: Tuple, Entity, Opportunity.
Column: Attribute, Key, Method.
- 4) Why isn't it possible to see the first five rows of a table?
- Every row is a File, when a row is inserted, it is created as a file. This file is stored into random memory address therefore it is not stored sequentially.
- When you select from table the order of rows in output depends on row address it will always be ascending order of row address, hence it is not possible to see first five rows of table.
